Professional Summary

Motivated B.Tech student specializing in Artificial Intelligence & Data Science with hands-on experience building full-stack web applications and AI-powered systems using React, Node.js, FastAPI, PyTorch, and modern web technologies. Skilled in developing scalable software solutions, RESTful APIs, responsive user interfaces, and machine learning applications. Strong foundation in Data Structures and Algorithms, problem solving, and competitive programming with active participation in hackathons and coding contests.

Education

Kalaigiar Karunanidhi Institute of Technology, Coimbatore

Sep 2024 – Present

B.Tech in Artificial Intelligence & Data Science

GPA: 7.00 / 10

New Power Matric Higher Secondary School, Coimbatore

Higher Secondary Education (HSE)

2024

SSLC

2022

Technical Skills

- **Programming Languages:** C, C++, Python, JavaScript
- **Frontend Technologies:** HTML, CSS, ReactJS, Vite, Context API
- **Backend Technologies:** Node.js, Express.js, FastAPI
- **Databases:** MongoDB
- **Core Concepts:** Data Structures & Algorithms, Object-Oriented Programming, REST APIs, Microservices Architecture
- **Tools:** Git, GitHub, VS Code, Postman
- **AI/ML:** PyTorch, Deep Learning, Image Classification

Projects

AgroIntel-AI – AI Powered Plant Disease Detection System

React, Node.js, FastAPI, PyTorch

- Developed a microservices-based full-stack application for real-time plant disease detection using leaf images.
- Integrated a ResNet-18 deep learning model through FastAPI for disease classification and prediction.
- Implemented asynchronous API communication between frontend and backend services to improve scalability.
- Built a responsive user interface for image upload, disease analysis, and result visualization.

Split – Group Payment and Expense Splitting Platform

MERN Stack, Redux

- Built a full-stack expense management platform enabling users to create groups, track expenses, and split payments.
- Implemented secure authentication and centralized state management using Redux.
- Redesign the application UI using modern glassmorphism design principles for improved user experience.
- Optimized backend APIs and MongoDB queries to enhance overall application performance.

Menswear E-Commerce Platform

React, Vite, Context API

- Developed a responsive e-commerce application with product browsing, filtering, shopping cart, and checkout functionality.
- Implemented global state management using React Context API and localStorage persistence.
- Created reusable components and optimized application performance through modular architecture.
- Enhanced user experience with responsive layouts compatible across devices.

Certifications

- Artificial Intelligence — Coursera
- What is Data Science — Coursera
- Introduction to MongoDB
- HTML — Coursera
- Getting Started with Full Stack Java Development
- Cisco Python Essentials 1
- Cisco Python Essentials 2
- Certificate of Excellence

Competitive Programming

- Active competitive programmer on LeetCode, CodeChef, and Codeforces.
- Regularly solve algorithmic problems involving arrays, linked lists, trees, graphs, dynamic programming, and greedy techniques.
- Strong understanding of Data Structures and Algorithms with consistent participation in coding contests.
- Maintains profiles across multiple competitive programming platforms and continuously improves problem-solving skills.

Hackathons & Achievements

- **Clitrix Hackathon** – Participated in a 24-hour hackathon organized by Zoho, collaborating with a team to develop and present a functional solution within limited time constraints.
- **GDG Hackathon** – Participated in a 24-hour offline hackathon organized by Google Developer Group, focusing on innovative software development and teamwork.
- Regular participant in coding contests, hackathons, and technical events focused on software engineering and AI-driven solutions.
